

Project Executable Files

Date	14 July 2026
Team ID	xxxxxx
Project Name	Smart Lender – AI-Based Loan Approval System
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	yes
3	requirements.txt / package.json / dependency file	yes
4	Database schema / seed files (if applicable)	N/A
5	Environment configuration file (.env.example or similar)	N/A
6	Deployed application URL (if hosted)	No
7	APK / Executable binary (if applicable for mobile/desktop apps)	Na
8	Dockerfile / Containerization config (if applicable)	Na
9	Test files and test results	Yes

10	Demo video or walkthrough (if required)	No
----	---	----

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```

Smart-Lender/
├── app.py
├── requirements.txt
├── README.md
├── models/
│   └── smart_lender_model.pkl
├── src/
│   └── predict.py
├── templates/
│   ├── index.html
│   ├── login.html
│   ├── register.html
│   └── result.html
├── static/
│   ├── css/
│   ├── js/
│   └── images/
└── uploads/
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not hosted (local system)
Login Credentials (Demo)	Username: demo Password: demo123 (<i>or your actual login</i>)
Platform / Hosting Provider	Local flask server
Repository Link	Your github repository link

Demo Video Link	Not available
------------------------	---------------

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Prerequisites

- Python 3.10 or above
- VS Code
- pip

Steps

1. Clone the repository
`git clone <your-github-repository-link>`
2. Open the project folder
`cd Smart-Lender`
3. Install dependencies
`pip install -r`
4. Run the application
`requirements.txt`
5. Open the browser
`python app.py`
`http://127.0.0.1:5000`
6. Register or log in.
7. Enter loan details and click **Predict**.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Application runs only on local server	Can be deployed later using render or railway
2	No email notification features	Planned for future enhancement
3	No admin dashboard	Future enhancement
