

Scalability & Future Plan

Date	14 July 2026
Team ID	xxxxx
Project Name	Smart Lender – AI-Based Loan Approval Sysyem
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state, ensuring long-term viability and impact.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Runs only on a local flask server	Users cannot access it online	High
2	Stores limited application data	Difficult to manage a large number of users	Medium
3	Basic login security only	Security can be improved	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports a small number of users	Deploy on cloud(render/aws/azure) with load balancing
2	Data Storage	Local storage/basic	use MYSQL or mongoDB for scalable storage

		database	
3	Performance	Suitable for local testing	Optimize ML model and database queries, enable caching
4	Security	Username & password login	Add jwt authentication, otp verification and HTTPS

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 2	Cloud deployment and online access	3 months	Users can access the application from anywhere
Phase 3	Mobile application and email notification	6 months	Better user experience and engagement
Phase 4	Advanced ai model with real-time credit score analysis	1 year	More accurate loan approval prediction
